

Frontend Engineering Assignment

Deadline · 15 Aug, 11:59 PM

React Native

01 The assignment

Start by downloading the [BlinkMoney Android app](#).

Build and ship **a genuinely new feature, or a tectonic change to an existing experience**, in React Native – something that could move one of these outcomes:

Engagement

Gets users to come back and act, not just open.

Referral

Makes a user pull another user in.

Wealth gamification

Makes the Save → Grow → Borrow loop visible and rewarding.

Lead magnet

Gets someone to install or sign up who otherwise wouldn't.

Virality

Something a user shares without being asked.

You decide what to build.

No detailed problem statement. No Figma.

02 Frontend

We want to see how you turn an idea into a [polished, working React Native experience](#).

- UI quality and visual hierarchy
- Interactions, animations and micro-interactions
- Responsive layouts
- Loading, empty, error and success states
- Navigation and edge cases
- Reusable, maintainable components
- Performance

Use BlinkMoney's existing **colour palette, typography and visual language** as your design reference:

blinkmoney.in

03 What we look for

Because we respect your time, here's exactly what we're screening for:

- People who **think out of the box**
- People who can **join immediately**
- People who are **engineers at heart**
- People with a strong **builder mindset**

04 What we're evaluating

- How creative and non-obvious your thinking is
- Frontend execution and attention to detail
- Whether you can ship something that actually works
- Your critical thinking — **list every edge case you can find**
- Whether you can build independently

05 Automatic reject

- × A bug fix — you're not a QA
- × A mutual fund analyser
- × A minor UI fix on an existing flow
- × Static screens with no meaningful interaction

There is **no single correct answer**. We want to see what you build when nobody tells you exactly what to build.

Submit your work

SUBMIT HERE forms.gle/kHsNC4NkPN9hCfc69

DEADLINE 15th Aug, 11:59 PM

QUESTIONS mridul.mathur@blinkmoney.in

Good luck. We're looking forward to seeing what you build.
